

I am science he said

(penned upon seeing writers post articles that are nonchalant, 'here we go again', dismissive, or outright incorrect after A Fauci's taking of the 5th 'testimony' took place on July 29, 2026)

Nancy Mroczek PhD August 1, 2026

For now at least Fauci is not calling the shots (pun intended)

Once a lie as in 'the mrna covid shot was ok' takes hold, there's no persuading those who will not see

You've got to be too ill-informed to call what's happening with Fauci in congress something less than imperative

Are you listening to what has been testified to/researched by credentialed, knowledgeable scientists over the time since the pandemic;

they & so many others have found highly deleterious realities to the mrna disaster - scientists as qualified as Fauci or any health/medical professional

I hope you are paying attention

I have followed this a lot since inception & not from the congressional hearings

I & many many others, including also, especially, the injured, know the lousy reality from early on starting 2020

It's no casual matter or matter for disdain

We haven't learned from other lies that have been shown false

If pursued properly, sincerely, these would have revealed the reality in spite of the msm & competing party lies

Russagate is/was a pisser to unravel & it's still believed; covidgate is even worse

There is SO MUCH sound evidence of how harmful the shot was - including living & dead victims

Where was the media when persons WERE sounding the alarm; nurses on talk radio shows stressing how ppl were getting ill-affected; some dead, others seemingly permanently disabled Myocarditis abounded-- as well as stroke, heart attack, liver dysfunction, lung embolisms, cognitive malaise, etc, etc, etc, you name it --the spike protein invaded everywhere in the body

The ills are & were so-o-o many

we will never know what, if any, harm the spike proteins have exerted or continue to exert on the body

The head of the world health org not long ago said liver cases skyrocketed under mrna

A major yale cancer specialist some time ago said cancers were much more & more aggressive post mrna, etc, etc

Afflicted persons were telling their stories or trying to tell them as they met a disinterested , hostile, & deaf audience

Doctors in, & especially outside, the U S were politely/quietly examining/researching & being careful to not be blunt about what they were seeing or thinking b/c of the castigations

To this day a lot of duly accredited research could/can not be revealed on air if it did/does not tow the line

Even as i write, materials that are duly done research by credentialed actors cannot be shown on the internet or the persons (doctors) will be banned from showing videos whatsoever

The journals, medical groups, pharma, etc, were/are all in on it

A group of post mrna very shot-compromisd persons went to the U S congress one day some time ago

All the majors: cdc, nih, Fauci, medicare, etc, etc, were invited

None showed - a kick in the teeth

Very few congressional persons were in attendance

Imagine how forlorn the victims must have felt & feel

I know MUCH MORE about this than I write here

Why did not the press know much more - b/c it's no longer 'objective' or intellectually curious enough

The press is corporate owned; big pharma is B I G

The press is partisan; it does groupspeak

Why did the press call any suggestion of problems "LIES", over & over again

Time to get looking at death statistics, unusual white clot numbers or a 4 ft long rubbery white clot, or, cardiac anomalies & death in young (& older) persons, cancers, on & on & on (the list is long)_____except, guess what, the U S did poor data accumulation, the great scientific country of the U S from which Fauci the "I am science" guy springs

Where does a premier science country get off not properly recording simple data of the anomalies/maladies/death causes that were being seen -

And another thing: recording deaths as due to covid was on autopilot

A former pfizer immunology vp was asked early in this fiasco why mrna was being given - he pondered & answered in a questiong tone: "to kill ppl?"

Don't look to ai to figure anythg out about the covid travesty

ai will give you the corrupt official story on anti covid mrna

ai is imperfect & corrupt from inception - whatever it does will be the same as its basis

Ps: the man, Fauci, got to do a controlled experiment on a captive population regarding his favored research - ie creating, watching the effects of, & treating, pathogenicity in ppl dealg with it

What/who is a key player who works on out-of-the-way extremes to manipulate pathogens to greater human harmfulness: the "I am science" guy

Oh my goodness, the great science country has been carried away by fear, hysterical belief, groupthink, & locked mentation;

We are from the age of enlightenment to the lights gone dark

Objectivity is subjectivity & believe what you want to believe

Should thinking persons have taken notice that initial assurances about prevention of infection & transmission did not pan out in real life experiment time

The I am science guy got to see via a real life experiment what he didn't know or wouldn't tell

Though covid caused respiratory symptoms, it has been found to be not a pulmonary disease but rather a vascular one with other body system ramifications possible as well
The research continues

For the record, Fauci approved money to Wuhan Institute even as the U S had a ban on funding the kind of research it was/is doing
